Sequence 477. Application US/10244647

Publication No. US20030206887A1

GENERAL INFORMATION:

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceutical, Inc.

APPLICANT: Morriseey, David

TITLE OF INVENTION: RNA Interfering Nucleic Acid (siNA)

FILE REFERENCE: 400/60 (NRHBB02-1000)

CURRENT APPLICATION NUMBER: US 60/358,580

PRIOR FILING DATE: 2002-07-03

PRIOR PILING DATE: 2002-07-03

PRIOR PILING DATE: 2002-07-03

PRIOR PILING DATE: 2001-06-08

PRIOR PILING DATE: 2001-06-08

PRIOR PILING DATE: 2001-06-08

NUMBER OF SEQ ID NOS: 1524

SOFTWARE: Patentin Version 3.0

US-09-82.7958-760, Application US/09827998

Sequence 760, Application US/09827998

Patent No. US20020102252A1

GENERAL INPORMATION:

APPLICANT: GJANDON, MAIK

TITLE OF INVENTION: NOVEL ISOFORMS OF HUMAN PREGNANCY-ASSOCIATED PROTEIN E

FILE REFERENCE: MDAWORF-8

CURRENT FILING DATE: 2001-04-06

PRIOR FILING DATE: 2000-05-26

PRIOR APPLICATION NUMBER: US 60/236,359

PRIOR FILING DATE: 2000-09-27

NUMBER OF SEQ ID NOS: 1881

SOFFWARE: Acomica Sequence Listing Engine
                                                                                         ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ö

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           US-09-864-785-346/C

US-09-864-785-346/C

Sequence 346, Application US/09864785

Patent No. US20020177568A1

GENERAL INPORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Braper, Ken

APPLICANT: McSwiggen, Jim

TITLE OF INVENTION: Levels of NP-Kappa B

FILE REFERENCE: 400/022 (MBHB00-812-D)

CURRENT APPLICATION NUMBER: US/09/864,785

CURRENT PILING DATE: 2001-05-23

NUMBER OF SEQ ID NOS: 3929

SOFTWARE: PatentIn version 3.0

SEQ ID NO 346

LENGTH: 17
                                                                                                                                                                                      Sequence 345, Application US/09864785

Sequence 345, Application US/09864785
